

PROJECT TESTING PHASE

Import Data using Transform Maps (Spreadsheet)

1. Test Objective

The objective of testing is to verify that employee data is correctly imported from a spreadsheet into ServiceNow using Import Sets and Transform Maps.

Testing also verifies that Coalesce correctly identifies existing records and prevents duplicate records.

2. Test Environment

Platform: ServiceNow

Input: Employee Spreadsheet (.xlsx)

Source Table: Employee Import

Target Table: Employee Test

Main Feature: Import Sets and Transform Maps

Duplicate Prevention: Coalesce using Employee ID

3. Test Cases

Test Case 1 – Spreadsheet Import

Test: Upload the employee spreadsheet using Load Data.

Expected Result: The spreadsheet data should be successfully loaded into the Employee Import table.

Result: Pass

Test Case 2 – Field Mapping

Test: Verify the mapping between source fields and target fields.

Expected Result: Employee ID, Employee Name, Email, Department and Location should be mapped correctly.

Result: Pass

Test Case 3 – Initial Transformation

Test: Run the Transform Map after importing the spreadsheet.

Expected Result: Employee records should be created in the Employee Test table.

Result: Pass

Test Case 4 – Coalesce Update

Test: Upload data containing an existing Employee ID with modified employee details.

Expected Result: The existing employee record should be updated instead of creating a

duplicate record.

Result: Pass

Test Case 5 – New Record Insert

Test: Upload employee data containing new Employee IDs.

Expected Result: New employee records should be inserted into the Employee Test table.

Result: Pass

Test Case 6 – Duplicate Data

Test: Upload the same spreadsheet data again.

Expected Result: Duplicate records should not be created because Employee ID is used as the Coalesce field.

Result: Pass

Test Case 7 – Reports

Test: Verify the Department, Location and Employee List reports.

Expected Result: Reports should correctly display employee information and provide useful data analysis.

Result: Pass

Test Case 8 – Dashboard

Test: Verify the Employee Analytics Dashboard.

Expected Result: The dashboard should display the configured employee reports correctly.

Result: Pass

4. Test Results

Spreadsheet import – Passed

Field mapping – Passed

Transform Map – Passed

Coalesce update – Passed

New record insertion – Passed

Duplicate prevention – Passed

Reports – Passed

Dashboard – Passed

5. Conclusion

The testing confirms that the ServiceNow Import Sets and Transform Maps solution successfully imports employee data from a spreadsheet, updates existing records using Coalesce, prevents duplicate records and displays employee information through Reports and Dashboard.
