

7. Project Demonstration

Import Data using Transform Maps (Spreadsheet) — ServiceNow Micro Project

Demo Objective

Demonstrate the complete working flow of the ServiceNow employee data import project.

Demo Sequence

- Show the prepared Excel spreadsheet.
- Show Employee Test table and fields.
- Open Load Data and show Employee Import.
- Open Sample Spreadsheet Import Transform Map.
- Show source-to-target field mappings.
- Run Transform and show success.
- Open Employee Test and verify records.
- Show Coalesce enabled on Employee ID.
- Load the second spreadsheet.
- Run Transform again.
- Open Transform History and explain inserted/updated results.
- Repeat the same import and explain ignored/skipped results.
- Open Employees by Department report.
- Open Employees by Location report.
- Open Employee List Report.
- Open Employee Analytics Dashboard and show all three reports.

Short Presentation Script

Good morning. My project is Import Data using Transform Maps using a Spreadsheet. The purpose is to import employee data from Excel into ServiceNow efficiently. I first load the spreadsheet into an Import Set, then use a Transform Map to map the source fields to the Employee Test target table. I enabled Coalesce on Employee ID so existing employee records are updated instead of creating duplicates. Finally, I created reports and an Employee Analytics Dashboard to visualize the employee data.

Viva Questions

- Import Set — a staging area for external data before transformation.
- Transform Map — defines how source data is mapped and transformed into a target table.
- Coalesce — identifies matching target records so existing records can be updated instead of duplicated.
- Employee ID — the Coalesce field used in this project.
- Transform History — used to inspect transformation results such as inserted, updated, skipped, or ignored records.
- Dashboard — combines reports into a centralized visual view.

Demo Checklist

- Excel file ready.
- ServiceNow instance accessible.
- Employee Test table ready.
- Employee Import table ready.
- Transform Map ready.
- Field mappings visible.
- Coalesce enabled.
- Second Excel file ready.
- Transform History accessible.
- Three reports saved.
- Employee Analytics Dashboard saved.
